

Hamza Abdirahman

Flutter Developer

Hyderabad, Telangana 500008

hamzaking06@gmail.com

+91 87900 12761

Aspiring Flutter Developer with a solid foundation in cross-platform app development using Flutter. Completed a certified Flutter course and built multiple hands-on projects showcasing UI design, firebase integration, state management, and API integration. Eager to contribute to real-world development through a Flutter internship, collaborate with tech teams, and further grow my skills in mobile application development.

Work Experience

Flutter Developer (Instructor-Led Training)

Udemy Online Learning / Self-Paced Project-India

Part-time

May 2025 to Present • Part-time

1. Expense Tracker App

A comprehensive mobile application built to log, manage, and visualize daily expenditures.

- Engineered a responsive and adaptive user interface to ensure seamless display and functionality across various device sizes and orientations
- Implemented advanced state management and interactivity using stateful widgets to handle complex user interactions.
- Applied custom theming and styling to create a professional and consistent user experience throughout the application

2. Shopping List App

An application focusing on user data management, persistence, and backend connectivity.

- Developed robust features for handling user input and performing form validation to ensure data integrity.
- Successfully implemented backend integration by utilizing packages for sending HTTP Requests, mastering GET, POST, and DELETE operations to manage item persistence and removal.

3 Meals App

A multi-screen navigation application showcasing complex UI flows.

- Designed and implemented the architecture for building Multi-Screen Apps.
- Utilized Riverpod for state management across multiple screens, ensuring efficient data flow and maintenance throughout the application.
- Mastered and applied Flutter's built-in tools for Navigating Between Screens using defined routes and passing data.

4. Chat App with Firebase

A real-time communication platform demonstrating experience with cloud services and notifications.

- Built a full-featured chat application leveraging Firebase for real-time data storage and synchronization.
- Mastered User Authentication flows (Sign-up, Log-in) to secure user data and personalize the chat experience.

- Integrated Push Notifications to alert users of new messages, showcasing experience with advanced mobile features.

Education

Marketing & HR (MBA)

Bharatiar university-Erode, Tamil Nadu

Full-time | August 2019 to August 2022

Scored: 7.1

Course work : Brand management, service marketing

Computer science (Bachelor of computer applications)

Osmania University-Hyderabad, Telangana

Full-time | June 2016 to July 2019

Scored: 7.12

Coursework : Database Design, Software Engineering, Web Technology, Java
